Agenda Commentary

Item Title/ Subject: Disinfectant Plan for Water System

Staff Source: City Manager, Steve Hewitt

Date: Nov. 16, 2012

History/Background Information:

Areas of our Water Distribution System struggle to maintain Chlorine levels due to low flow. To keep the water safe for consumption, the City has practiced Flushing Hydrants, which resolves the concerns on a temporary basis. Staff must do this nearly every day to maintain safe levels. Thousands of Gallons of Water is wasted.

Subject Summary:

Clinton (as many communities) has some older metal water lines that have sediment built up (mostly iron residue). Flushing causes much of this sediment to break apart which creates the discolored water and bad taste (however it is safe). This will travel throughout our system. It is impossible to replace all the lines tomorrow and locating the worst issue is an on-going daily operation. The Goal is to treat the water at the locations needed with a Chlorine Booster. To have this put in place, it requires an Engineering report and plan of action. PEC can provide this and we hope to obtain a permit and place a booster at the needed location to resolve the water quality issue and cause some relief with the discoloration issue.

Recommendation:

The contract proposal from PEC is within my authorization capability as a City Manager to authorize. However, I want the Council and the Community to be aware that we are working towards a resolution. Other issues have contributed to the problem (drought, temperatures, and the 100% Foss Water chemical combination in our lines).

Staff (Severn Trent and City PWA Director) will be providing an update of what actions/steps are being taken and this one element.

Staff recommends (this is required for DEQ permitting) the approval of this contract. This will conserve water (stop with the waste of flushing) and help the sediment discoloration, and chlorine disinfection levels will be resolved.

This project could take more than 6 months waiting for DEQ permitting authorization.

Price/Cost: **Not to Exceed $9000.00**
