Councilman Marcy asked how big a problem the $7,500 limit has been.

TO: GRAYSON BOTTOM CITY MANAGER & CITY COUNCIL

FROM: TOBY ANDERS CODE ENFORCEMENT OFFICER

SUBJECT: 305 N. 17TH

DATE: 12/19/2008

The current owner of the trailer house that is being brought to the council for condemnation is Huey Kyle Roper. Several attempts have been made to try contact Mr. Roper and all have failed. There has been numerous problems with the trailer house for example grass, weeds, and unsecured structure. At one point in the spring of '08 there was a gentleman that was gong to purchase the property. Grayson and I meet with him in regards to what needed repaired. Since that time that gentleman has moved. At this time the trailer is open and unsecured. Charles and I secured the trailer 3/28/08 at that time we inspected the trailer it had holes in the floor, doors that would not lock, and water leaks. On December 3rd 2008 we held an abatement hearing that included this trailer, as of December 19th that certified letter has not been returned. Water service has been off and on over the past several years. It is my recommendation to the City Council that this trailer house be condemn and all contents on the property be removed due to the lack of maintenance and repair that the trailer needs. This trailer invites unlawful activity in that area do to the fact that it is not secured.

Re: Pond Liner

Included in the budget for the Golf Course Improvement was a line item for a pond liner. The amount of the line item was $15,000. This amount came from a relatively recent contract amount for lining a 40,000 sq ft. pond. The original estimate of our pond size was 54,000 sq. ft. Our pond ended up being just over 108,000 sq. ft.

Realizing that our pond was considerably larger than anticipated Kelly, Arnold and I began exploring alternatives. We were trying to compare the costs associated with not lining the pond with a polyethylene liner versus a tilled in mineral to seal the pond from the leaking problems we had experienced in the past. I called the U.S. Army Corp of Engineers, the local and state offices of the U.S. Natural Resource Conservation Service, local pond builders, and the OSU Agriculture Engineering School. The best and most complete information came from OSU. The professor indicated that in a golf course irrigation application, as opposed to an agriculture application, that water quality was critical. Lining the pond with polyethylene solves water quality issues. If we wanted to use a mineral to stop leaking it could be done, however we would need a mineral not readily available in Oklahoma and not the mineral utilized by oil field service companies. Further, we would need to add a floating intake and a filter to achieve the water quality necessary for a golf course.

	Cost Associated with Mineral Liner	
Purchase of Mineral directly from mine in Montana		$10,000 plus shipping by rail
Cost of Transfer and application		Unknown
Purchase of Filter		$25,000
Purchase of Floating Intake		$15,000
	Total	Over $50,000

The next issue was to find a firm that could supply the material and do the installation. I visited with the people at Superior Oilfield Service about who they use for this purpose. They gave me the names of two companies. Both of those companies were no longer in the business or had sold their

operation. I asked to be referred to their successor companies. That didn't happen. While excavating the pond at the golf course I was approached by a gentleman by the name of Benny Whery. Mr. Whery lives in Yukon but purchases his vehicles and does other business in Clinton. He had seen what we were doing and asked if we were going to line the pond. We indicated that we were in some fashion. He indicated that he was bound by a non-compete agreement with the company he had sold to out of state, but would be released from that agreement after December 31, 2008. It was his intention to go back into business after that time and would be interested in providing the polyethylene liner and installing it.

After searching for several months I have found two companies that have an interest in a project as small as ours. The first is Extreme Plastics Plus, Inc. of Yukon which has quoted $42,500 and the second is In-Line Plastics, LC of Houston, TX that has quoted $64,125 with the City being required to provide some of the labor.

It is my recommendation that we accept the quote of Extreme Plastics Plus, Inc. for the lining of the pond with a 30 mil. Polyethylene Liner and approve the expenditure of funds from the Capital Improvement Fund in the amount of $42,500 for labor and material.
